

Exp:1 DEVELOP AND DESIGN A APP TO CHANGE BACKGROUND COLOR

Aim: To create an intuitive, engaging, and seamless music streaming experience that allows users to discover, listen to, and share music effortlessly.

Procedure:

1. **Research & Analysis:** Understand user needs and competitor apps.
2. **Wireframing:** Design basic layouts for key screens (Home, Search, Library, Now Playing).
3. **UI Design:** Develop high-fidelity visual designs using color schemes, typography, and icons.
4. **Prototyping:** Build interactive prototypes to test user flows and interactions.
5. **User Testing:** Collect feedback from real users to refine and optimize the design.
6. **Handoff:** Provide developers with assets and specifications for implementation.

Result:

A polished, user-friendly music streaming platform with smooth navigation, personalized playlists, and robust music discovery features.
