NEWS APP

Aim:

Design a user-friendly news app UI that allows users to easily discover, read, and share the latest news articles and updates in real-time.

Procedure:

1. **Research:** Identify user needs, preferences, and analyze competitor news apps to determine essential features like personalized news, real-time updates, and easy navigation.

2. **Wireframe:** Create basic layouts and user flows for browsing news, reading articles, and managing preferences.
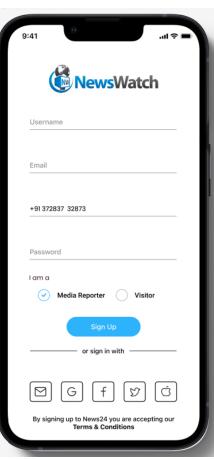

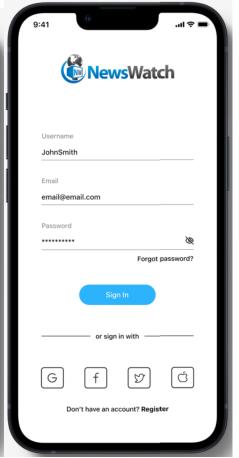

3. **Design in Figma:**
   - Set up artboards for various devices (mobile, tablet, desktop).
   - Design screens: Home, Categories, Article Detail, Search, Bookmarks, and Settings.
   - Develop a style guide: Colors, typography, icons, and UI components.
   - Prototype with interactive links to showcase the user flow and app functionality.

4. **Feedback:** Share the designs with stakeholders and users for feedback, then refine the UI based on input for improved user experience.
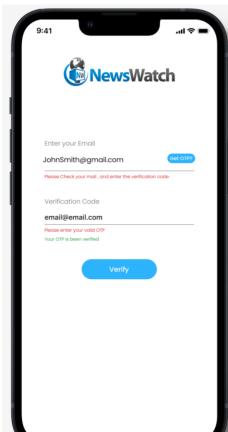

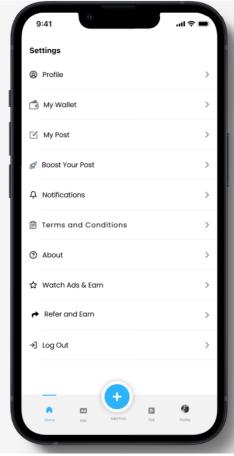

Result:

Deliver high-fidelity mockups, an interactive prototype, and a style guide, all ready for development to create a seamless and engaging news app.
